THE STARS HAVE ALIGNED... CREATE YOUR OWN CONSTELLATION!

Do the universe a favor and don't hide your magic! Watch your inner artist shine as you paint this personal masterpiece of your zodiac constellation. No telescope needed to see your starry sky. Place your finished painting under direct light for 2-3 minutes then go to a dark area to watch it **GLOW!**

TO WATCH THE
STEP BY STEP VIDEO!

STEP BY STEP

- Lay down tablecloth newspaper, **supplies** etc.
- **Fill rinse can** with water
- CAREFULLY **pour paint** into circular sections of palette

- With your brush add **water** into 1 **tray** of palette

NOTE: Keep **glow in the dark** paint in container, use your brushes to add it when needed. ●

- Place and trace **template (CIRCLES ONLY)** towards the center of the paper with pencil

CLEAN UP: Rinse palette/brushes. Store brushes upright. If things get messy, paint comes off with a few washes.

Skill Level

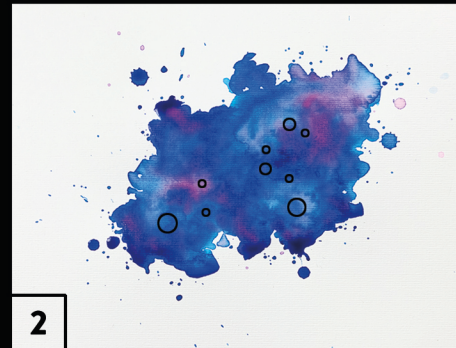

ARTSY
Lynn®

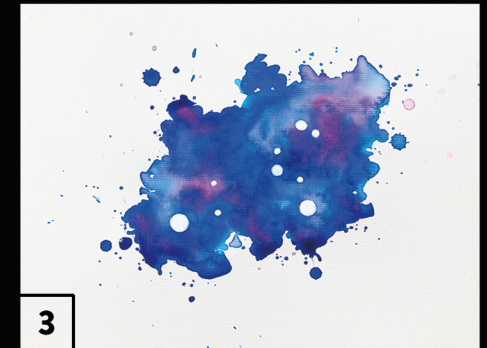

1

- Use **#12 brush** to **mix** a large amount of **blue paint** into the **water tray**
- Loosely **drop and splatter paint** over/around your stars to make the sky background
- **Drop blue paint** (no water) into the wet areas

2

- (rinse your brush thoroughly)
- FAN DRY 1-2 minutes
- **Drop pink paint** (no water) into a few small areas of sky (you may add a little water to help blend it if needed)
- FAN DRY 8-10 minutes
- Dab damp areas with paper towel

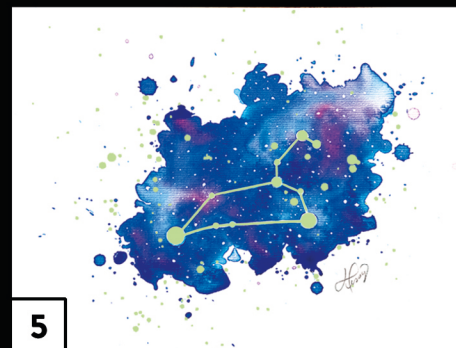

3

- (rinse your brush thoroughly)
- **WARNING** let your paint dry... blow on it, fan it more or read some of the newspaper if it is still wet
- Use **#2 brush** to add **white paint** to the large circular stars

4

- **Paint** thin connecting lines to form your constellation (use your template as reference)
- FAN DRY 1-2 minutes
- **Paint** small tiny stars all over the sky background (rinse your brush thoroughly)
- FAN DRY 3-5 minutes

5

- Go over the large stars and connecting lines with **glow in the dark paint**
- **Hold** pencil over paper and tap **#12 brush** filled with **glow in the dark paint** (add a little water if needed) to add splatters to sky

6

GLOW in the **DARK!**

- FAN DRY 1-2 minutes
- Place painting under direct light for 2-3 minutes
- Go to a dark area to gaze at your new **ZODIOSCOPE** painting!
